Application Support Analyst

Nurture Software Solutions - Hyderabad, Telangana
November 2007 to August 2009

India

Solution- Environment SQL, Oracle, HTML, JavaScript

The project involved end to end implementation of Finacle E- Banking in Andhra Bank, Hyderabad. My key responsibility was to provide the functional support for different modules of e-banking and to take the customization requirements from the bank and handling the same. This solution can be interfaced with any core banking solution directly or through an industry standard middle ware. It provides real time access to their relationships with the bank such as account inquiries, fund transfers, credit cards. It also allows making the payments to individuals or institutions and other general payments on-line. It has also electronic bill presentment and payment (EBPP) module which allow user to make their utility bill payments.

Responsibilities

1. Implementation of Retail, Corporate module of E banking.
2. Implementation of tax payment through E-banking.
3. Development of E Banking Tax Payments Reports using Sql Commands.
4. Implementation of Alert server and SMS Banking.
5. Implementation of Online Trading Module through E-Banking.
6. Web page customization according to bank requirements using java scripts and html.
7. To ensure that application is working as expected.
8. Maintaining Issue Tracker of Issues and solving the same.
9. Ensure client satisfaction with the applications and infrastructure.
10. Testing User change requests or enhancements in existing system.
11. Implementation of credit card module in e-banking.
